Notes and Answers for Parents

Non-Verbal Reasoning Pack 1

11+ Practice Papers

GL Assessment®

Introduction

About the Tests
These tests are designed to give your child practice in sitting a formal type of examination before they take the actual 11+ test.

The papers are presented in a very similar way to many of the test papers used for selection at 11+, and the questions represent the type of questions used, although they may not be exactly the same level of difficulty. Therefore, your child's scores on these tests will not necessarily be a direct indication of their likely score on an actual 11+ test. Furthermore, the pass marks for the actual test will depend, to some extent, on the overall standard of the candidates.

Preparation for Testing
Give your child the test at an appropriate time, when they are both physically and mentally alert. Choose a suitable area for them to work in – make sure they can work comfortably and are free from any distractions.

Before your child takes a practice test, discuss with them the reasons why they are doing the test. Also, explain that they might find some of the questions difficult, but that they should work as quickly and as carefully as they can. If they get stuck on a question, they should not waste too much time on it but move on to the next one. If they have time left at the end, they can go back to it then.

Taking the Tests

Your child should record their answers in the Answer Sheets booklet provided – not in the test booklet. Answer Sheets are provided for all three tests in this pack.

The actual 11+ test will be marked by a computer, but you will need to score the practice tests yourself using the Answer Key in this booklet. It is important for your child to learn how to use the Answer Sheets properly, in preparation for the real test: they should record an answer in the appropriate box by drawing a clear line through it with a pencil. Mistakes should be rubbed out carefully and **not** crossed out, since in the actual test this would not be recorded correctly by the computer. You can ignore the boxes at the top marked 'Pupil Number', 'School Number' and 'Date of Birth'. These need to be filled in only for the actual test. By encountering these features now, your child will be more familiar with the style of the actual 11+ paper when they take the test.

Ways to Do the Test Session

The tests have two separate sections. Each section is preceded by instructions on how to answer the questions, one or two examples and some practice questions. This is then followed by 20 test questions.

In the actual exam, the invigilator will read these instructions aloud to candidates.

There are three main ways you can do the Non-Verbal Reasoning tests at home:

1. **a.** Turn to Section 1 of the test booklet with your child. Read through the example at the top together. Then ask your child to do the practice questions, giving them the answers to these when they have finished (see Answer Key). Finally, time them for 10 minutes on the following 20 questions.

   b. If your child has not finished the 20 questions after 10 minutes, draw a line underneath the question they are on, or draw a ring around its number, and then let them carry on until they have completed the section. When you mark the test, you will be able to see how many questions your child got right in the allocated time and how many questions overall. This will give you a good indication of whether they need to develop their speed and/or work more accurately.

   c. Repeat this procedure for the second section.

OR

2. **a.** Ask your child to read through the example in Section 1 by themselves and do the practice questions, then give them the answers (see Answer Key). They should tell you when they are ready to begin the timed section. You should then time them for 10 minutes on the following 20 questions.

   b. As above for option 1.

   c. As above for option 1.

OR

3. **a.** You can simply give the test to your child and ask them to read through and complete it on their own, with no help, involvement or timing on your part. In this case you will not be able to give them the answers to the practice questions until they have finished the whole test. You should tell them to ignore the instructions stating 'Do not turn over until you are told to do so'.

Please note, if you want your child to experience the test as closely as possible to the real test, you should choose option 1. The test should take around 30 minutes in total, including practice questions.

Marking and Feedback

The answers are provided on pages 5–7. Only these answers are allowed. One mark should be given for each correct answer – do not allow half marks or 'the benefit of the doubt'. Do not deduct marks for wrong answers.

The results may suggest that more practice is needed. Always try to be positive and encouraging. Talk through the mistakes your child has made in a constructive way. Work out together how to get the right answer.
